

OPEN HOUSE

Psychology Graduate Programs

Date: Friday, November 21

Time: 4:00-5:00 p.m. AT

Zoom: [Join Zoom Meeting](#)

Meeting ID: 893 5701 1024

Passcode: 629392

We're pleased to offer an open house to help guide undergraduate students (or former students) in psychology who would like to learn more about Saint Mary's University's Psychology graduate programs in Industrial/Organizational (MSc and PHD) and Forensic (MSc) Applied Psychology.

Our programs are "cohort-based," with students learning and working closely with a small group of peers.

This open house session will be informal and synchronous, and we will not be recording. We'll give a ~20 minute overview of our programs followed by a Q&A (spoken or via Zoom chat).

Feel free to log in and just listen, or ask questions about successful applications (Due Dec. 15), program components, faculty research, funding, thesis, internship/practicum or Halifax/ university life.

See the next page for answers to frequently asked questions on our graduate programs in Psychology at Saint Mary's University.

Dr. Debra Gilin
Professor and
Graduate Program
Coordinator

Dr. Marguerite Ternes
Associate Professor
and Forensic Area
Faculty Lead

Applications

The deadline for applications is December 15

Requirements

Our programs are competitive, with high grades, research experience (including conference and journal publications), and fit with our faculty research interests being the priority factors.

Applicants are encouraged to show clearly how their research fits with our faculty. Using your letter of intent or personal statement to demonstrate connection and mutual research interests with our faculty will improve your chance of acceptance. Applicants do not need to secure a research supervisor to apply.

GRE scores are not required for graduate program applications.

Scholarships

We offer graduate scholarships to most in-person candidates who receive an offer of admission, and encourage all to apply for additional external scholarships (SSHRC, Nova Scotia Graduate Scholarships, CIHR).

Prerequisites

The minimum Grade Point Average to apply is the equivalent of 3.3/4.3 (in the Canadian system), while the average of the students we offer admission is typically around 3.9/4.3.

MSc in Applied Psychology program

Industrial/Organizational and Forensic Psychology streams

You should have an honours undergraduate degree in psychology or equivalent (a directed research course supervised by faculty and advanced quantitative course/s). Your undergraduate program must include a minimum of 60 credit hours of psychology courses.

A remote study option is offered for the MSc and Diploma in I/O Psychology programs.

PhD in Industrial/Organizational (I/O) Psychology

You should normally have previously completed an honours undergraduate degree in psychology, and a masters degree in I/O Psychology or a highly related field with an empirical masters thesis.
